Programming Tips

TIPS: The LED sign is menu based and very easy to navigate. Simply press [ENTER] to select an option and another menu will become available to you. See page 5 in the instruction manual for a complete menu map. Use the **UP/DOWN effect arrow** buttons to navigate through the menu lists. Use the [ESC] button to back up one level without exiting. At any time, you can press the [MENU] button to exit out of the menu and view saved messages.

Change the font: Get to the **"Input Message"** screen, type out one letter then move the cursor back to the left of the same letter and press the **[FONT]** button (next to the A button). A flashing square will appear around the letter indicating you can now change the font. Keep pressing the **[FONT]** button to rotate through the available fonts. Choose your font by pressing the **right speed arrow** key to move the cursor to the right of the letter. Continue typing your message and the font will stay selected until you change it again.

Change the color: Get to the **"Input Message"** screen, type out one letter then move the cursor back to the left of the same letter and press the **[COLOR]** button (next to the Z button). A flashing square will appear around the letter indicating you can now change the color. Keep pressing the **[COLOR]** button to rotate through the available colors. Choose your color by pressing the **right speed arrow** key to move the cursor to the right of the letter. Continue typing your message and the color will stay selected until you change it again.

Access orange symbol characters: Press and release the orange **[FN]** button on the bottom left of the remote, then press the letter with the desired character. Press the **[FN]** button again to return to the regular white characters.

Change scroll speed: While viewing your live scrolling message, press the **left speed arrow** button and the scrolling speed will decrease. Press the **right speed arrow** button to increase scrolling speed.

Change sign brightness: While viewing your live messages, press the orange [FN] button followed by the **up/down effect arrow** button. You will see a number appear in the center indicating brightness level. Use the **up/down effect arrow** buttons to increase or decrease the brightness level as needed.

Turn off time: [MENU] → 1. Add MSG → 3. Insert Time → 2. Frequency → change frequency to "0m" by using up/down arrows. When done press [MENU] to exit.

Turn off date: [MENU] → 1. Add MSG → 4. Insert Date → 2. Frequency → change frequency to "0m" by using up/down arrows. When done hit [MENU] to exit.

Turn timer on/off: If the sign turns off and on randomly, your timer could be on. Turn it off by pressing [MENU] → 8. User Settings → 1. Timer, then toggle on/off with the **up/down effect arrow** buttons.

Thank you for visiting TV Liquidator, if you have any questions or need further assistance, call our customer support team at 1-888-885-7740.
